Guidelines (as per LOCF)

Artificial Intelligence (BHCS13) Discipline Specific Core Course - (DSC)

B.Sc. (Hons) Computer Science-VI Sem

UNIT	Chapters	Reference
1	Chapter 1: 1.1, 1.4	2
	Chapter 2: (complete)	2
2	Chapter 4 (complete)	3
	Chapter 7: (Complete)	3
3	Chapter 5: 5.1, 5.2, 5.3, 5.6	3
	Chapter 6: 6.1, 6.2	
4	Chapter 2: 2.1, 2.2, 2.3	1
	Chapter 3: 3.2 up to 3.2.2, 3.3 up to 3.3.2, 3.5, 3.6	1
5	Chapter 12: 12.1, 12.2, 12.3	1
	Chapter 1: 1.1, 1.2, 1.3, 1.4, 1.5	
	Chapter 2: 2.1, 2.2	
	Chapter 3: 3.1, 3.2, 3.4	4
	Chapter 5: 5.1, 5.2, 5.3	
	Chapter 6: 6.7.2	
6	Chapter 12: 12.1, 12.2, 12.3, 12.4 up to pg 247 (upto	3

Lab/ Practical Questions based on Artificial Intelligence (BHCS13)

- 1. Write a prolog program to calculate the sum of two numbers.
- 2. Write a Prolog program to implement max(X, Y, M) so that M is the maximum of two numbers X and Y.
- 3. Write a program in PROLOG to implement factorial (N, F) where F represents the factorial of a number N.
- 4. Write a program in PROLOG to implement generate_fib(N,T) where T represents the Nth term of the fibonacci series.
- 5. Write a Prolog program to implement GCD of two numbers.
- 6. Write a Prolog program to implement power (Num,Pow, Ans): where Num is raised to the power Pow to get Ans.
- 7. Prolog program to implement multi (N1, N2, R): where N1 and N2 denotes the numbers to be multiplied and R represents the result.
- 8. Write a Prolog program to implement memb(X, L): to check whether X is a member of L or not.
- 9. Write a Prolog program to implement conc (L1, L2, L3) where L2 is the list to be appended with L1 to get the resulted list L3.
- 10. Write a Prolog program to implement reverse (L, R) where List L is original and List R is reversed list.
- 11. Write a program in PROLOG to implement palindrome (L) which checks whether a list L is a palindrome or not.
- 12. Write a Prolog program to implement sumlist(L, S) so that S is the sum of a given list L.
- 13. Write a Prolog program to implement two predicates evenlength(List) and oddlength(List) so that they are true if their argument is a list of even or odd length respectively.
- 14. Write a Prolog program to implement nth_element (N, L, X) where N is the desired position, L is a list and X represents the Nth element of L.
- 15. Write a Prolog program to implement maxlist(L, M) so that M is the maximum number in the list.
- 16. Write a prolog program to implement insert_nth (I, N, L, R) that inserts an item I into Nth position of list L to generate a list R.
- 17. Write a Prolog program to implement delete_nth (N, L, R) that removes the element on Nth position from a list L to generate a list R.
- 18. Write a program in PROLOG to implement merge (L1, L2, L3) where L1 is first ordered list and L2 is second ordered list and L3 represents the merged list.
